

MOBILE CINEMA

>> The **Mobile Cinema** is a vehicle developed by FYM Engineering, which houses a multipurpose showroom prepared to be used completely independently regardless of the location. It is equipped with the most up-to-date audiovisual technology, used in conventional cinemas and rooms.

>> Main Features

- The vehicle is housed in a semi-trailer manufactured with the best materials and certified under European quality and safety standards.
- It is deployed and is fully functional in less than an hour and through a single operator.
- Capacity for 80 spectators and 2 wheelchairs, with access by ramp.
- It has cold/hot air conditioning. Complete acoustic and thermal insulation, which guarantees the absolute comfort of spectators.
- Equipped with a digital cinema system and Dolby Surround 7.1 sound.
- An audiovisual system with independent microphone for presentations and events.
- Integrated information booth and tickets sale service.
- Ultra-quiet electric generator and a dedicated uninterruptible power supply, to ensure its operation under any circumstances in any location.
- Motorised with an IVECO Stralis cabin to strengthen it as a robust and durable set.
- Fully customisable according to the client's needs.

>> Multiple Uses

- Film screening.
- Presentations and events.
- Conferences.
- Courses and training.
- Performances.
- Etc.

>> Standard Vehicle Offer

FYM Engineering offers in its projects a maintenance service of the audiovisual and mechanical systems of the vehicle, along with a continuous training program for operators, drivers and mechanics for a period of one year from the start-up of the vehicles.
