

OUTDOOR MOBILE CINEMA

>> For large events or those that require a considerable influx of public, FYM Engineering has developed the **Outdoor Mobile Cinema** concept. It is a two-axle truck designed to display high-quality content anywhere in the country's geography. It is equipped with a state-of-the-art waterproof and dustproof audiovisual system for daytime use even with direct sunlight.

>> Main Features

- Vehicle housed in an all-terrain two-axle truck (4x4). All the audiovisual equipment included is housed in the box itself.
- Prepared to display content up to 500 people.
- High quality 5 meters wide LED display with brightness suitable for daytime viewing and incident sunlight. IP67 Certification against water and dust.
- High power sound system with microphone included.
- A stage for presenters and/or artists.
- It is fully deployed in less than an hour and by a single operator.
- A fully autonomous vehicle, equipped with independent electric generator and uninterruptible power supply.

>> As in all its projects, FYM Engineering adapts to the client's specific needs and offers complete training and support for a period of one year after execution, guaranteeing maximum use of the solutions provided.
